

Sustainability Policy for Ghulam Ishaq Khan (GIK) Institute of Engineering Sciences and Technology.

Introduction:

GIK Institute is committed to promoting sustainability and environmental responsibility across all aspects of its operations. As a leading educational institution, we recognize our responsibility to contribute to a more sustainable future for our community and the planet.

Environmental Goals:

GIK Institute will reduce its carbon footprint through energy-efficient buildings, renewable energy sources, and reduced energy consumption.

GIK Institute will reduce its water consumption through water-efficient devices, water reuse systems, and educational campaigns to promote water conservation.

GIK Institute will reduce its waste generation through recycling initiatives, composting, and minimizing single-use plastics and other non-recyclable materials.

Social Equity Goals:

GIK Institute will promote diversity and inclusion across all aspects of the institution, including student recruitment, faculty hiring, and curriculum development.

GIK Institute will promote fair labor practices and ethical standards in all its operations, including purchasing practices and supplier selection.

GIK Institute will strive to provide equal access to education and opportunities for all students, regardless of their background, socioeconomic status, or other factors.

Economic Viability Goals:

GIK Institute will promote responsible financial management and long-term sustainability in all its operations, including budgeting, investments, and fundraising.

GIK Institute will support local economic development by sourcing goods and services locally, engaging with local businesses and organizations, and promoting economic growth in the surrounding community.

Conclusion:

GIK Institute is committed to promoting sustainability and environmental responsibility in all aspects of its operations. We recognize that sustainability is a shared responsibility and will work with our community to achieve our sustainability goals and contribute to a more sustainable future for all.
